Colloids and Surfaces, 23 (1987) 376–378
Elsevier Science Publishers B.V., Amsterdam — Printed in The Netherlands

Subject Index

Adsorption,
— and desorption of hydrolyzed metal ions. III. Scandium and chromium (Gray, Matijević) 313
— of dodecylammonium ion on quartz in relation to its flotation (Takeda, Usui) 15
Negative — of inorganic salts, sucrose and urea at solid–liquid interfaces (Nag et al.) 83
Adsorption capacity,
Enthalpy of displacement of binary liquid mixtures on solid surfaces. Part III. Determination of the — from calorimetric and adsorption data (Dékány et al.) 57
Aggregation,
The — of large polystyrene latex particles (Reynolds, Goodwin) 273
Alumina,
Electrophoretic behavior and surface reactions of sol-gel derived — (Lee, Hench) 211
Analcime,
The release of tritiated water from synthetic — into surrounding water (Todorović et al.) 345
Anionic micelles,
The role of — in enhancing fluorescence quenching of methylacridinium iodide by metal cations (Ebeid et al.) 363
Antimonite,
Surface phenomena of — in solutions of different flotation reagents (Popov et al.) 171
Asphaltene adsoprtion,
Particle–fluid interactions with applications to solid-stabilized emulsions. Part III. — in the presence of quinaldine and 1,2-dimethylindole (Menon, Wasan) 353
Binary liquid mixtures,
Enthalpy of displacement of — on solid surfaces. Part II. Analysis of S-shaped excess isotherms (Dékány et al.) 41
Enthalpy of displacement of — on solid surfaces. Part III. Determination of the adsorption capacity from calorimetric and adsorption data (Dékány et al.) 57
Binary mixtures,
Surface tensions of — : 2-propanol + dichloromethane and n-pentane + methylacetate at 198.15 K (Postigo et al.) 231
Synergism in — of surfactants. 6. Interfacial tension reduction efficiency at the liquid/hydrophobic solid interface (Rosen, Gu) 119
Boltzmann superposition principle,
The dynamic surface tension and the — (Balbaert, Joos) 259
Chromia gel,
Assessment of textural consequences of compacting calcined — by nitrogen sorption isotherms (Zaki et al.) 1
Chromium,
Adsorption and desoprtion of hydrolyzed metal ions. III. Scandium and — (Gray, Matijević) 313
Coatings,
Surface studies of TiO_2 pigment with especial reference to the role of — (Day, Egerton) 137
Collecting properties,
A method of comparison of the frothing and — of frothers (Małysa et al.) 29
Complexation constants,
Determination of surface ionization and — at colloidal silica/electrolyte interface (Milonjić) 301
Contact angle,
Determination of the apolar component of the surface tension of water by — measurements on gels (Van Oss et al.) 369
Desorption,
Adsorption and — of hydrolyzed metal ions. III. Scandium and chromium (Gray, Matijević) 313
Dichloromethane,
Surface tensions of binary mixtures: 2-propanol + — and n-pentane + methylacetate at 198.5 K (Postigo et al.) 231
1,2-Dimethylindole,
Particle–fluid interactions with applications to solid-stabilized emulsions. Part III. Asphaltene adsorption in the presence of quinaldine and — (Menon, Wasan) 353
Dodecylammonium,
Adsorption of — ion on quartz in relation to its flotation (Takeda, Usui) 15

Dynamic surface tension,
The — and the Boltzmann superposition principle (Balbaert, Joos) 259
Electrophoretic behavior,
— and surface reactions of sol-gel derived alumina (Lee, Hench) 211
Enthalpy of displacement,
— of binary liquid mixtures on solid surfaces. Part II. Analysis of S-shaped excess isotherms (Dékány et al.) 41
— of binary liquid mixtures on solid surfaces. Part III. Determination of the adsorption capacity from calorimetric and adsorption data (Dékány et al.) 57
Flotation,
Adsorption of dodecylammonium ion on quartz in relation to its — (Takeda, Usui) 15
Flotation reagents,
Surface phenomena of antimonite in solutions of different — (Popov et al.) 171
Fluorescence quenching,
The role of anionic micelles in enhancing — of methylacridinium iodide by metal cations (Ebeid et al.) 363
Frothers,
A method of comparison of the frothing and collecting properties of — (Malysa et al.) 29
Hydrolyzed metal ions,
Adsorption and desorption of —. III. Scandium and chromium (Gray, Matijević) 313
Inorganic salts,
Negative adsorption of —, sucrose and urea at solid–liquid interfaces (Nag et al.) 83
Interfacial layers,
Role of — in the properties of particle-filled polyolefin systems (Marosi et al.) 185
Interfacial tension,
Synergism in binary mixtures of surfactants. 6. — reduction efficiency at the liquid/hydrophobic solid interface (Rosen, Gu) 119
Liquid/hydrophobic solid,
Synergism in binary mixtures of surfactants. 6. Interfacial tension reduction efficiency at the — interface (Rosen, Gu) 119
Metal cations,
The role of anionic micelles in enhancing fluorescence quenching of methylacridinium iodide by — (Ebeid et al.) 363
Methylacetate,
Surface tensions of binary mixtures: 2-propanol + dichloromethane and n-pentane + — at 198.5 K (Postigo et al.) 231
Methylacridinium iodide,
The role of anionic micelles in enhancing fluorescence quenching of — by metal cations (Ebeid et al.) 363
Nitrogen sorption isotherms,
Assessment of textural consequences of compacting calcined chromia gel by — (Zaki et al.) 1
Particle–fluid interactions,
— with applications to solid-stabilized emulsions. Part III. Asphaltene adsorption in the presence of quinaldine and 1,2-dimethylindole (Menon, Wasan) 353
Pentacarbonyliron oxidation,
Characterization of the colloidal products of — (Jafelicci Jr et al.) 69
n-Pentane,
Surface tensions of binary mixtures: 2-propanol + dichloromethane and — + methylacetate at 198.5 K (Postigo et al.) 231
Phosphatidylinositol,
Vesicle–vesicle interaction and forces between bilayers in phospholipid systems incorporating — (Hammond et al.) 241
Polyelectrolytes,
Mechanisms of TiO_2 pigment retention on pulp fiber with — (Alince) 199
Polymer/polymer complexes,
Solubilization by — (Saito, Sakamoto) 99
Polyolefin,
Role of interfacial layers in the properties of particle-filled — systems (Marosi et al.) 185
Polystyrene,
Interaction of pigments with — latex prepared using a zwitterionic emulsifier (Kato et al.) 159
The aggregation of large — latex particles (Reynolds, Goodwin) 273
Porosity,
Thermoporometric study of the intra-aggregate — of pyrogenic silica dispersed in aqueous and non-aqueous liquids (Ehrburger, Lahaye) 105
2-Propanol,
Surface tensions of binary mixtures: — + dichloromethane and n-pentane + meth-

ylacetate at 198.5 K (Postigo et al.) 231
Pulp fiber,
Mechanism of TiO_2 pigment retention on — with polyelectrolytes (Alince) 199
Pyrogenic silica,
Thermoporometric study of the intra-aggregate porosity of — dispersed in aqueous and non-aqueous liquids (Ehrburger, Lahaye) 105
Quartz,
Adsorption of dodecylammonium ion on — in relation to its flotation (Takeda, Usui) 15
Quinaldine,
Particle-fluid interactions with applications to solid-stabilized emulsions. Part III. Asphaltene adsorption in the presence of — and 1,2-dimethylindole (Menon, Wasan) 353
Scandium,
Adsorption and desorption of hydrolyzed metal ions. III. — and chromium (Gray, Matijević) 313
Silica/electrolyte interface,
Determination of surface ionization and complexation constants at colloidal — (Milonjić) 301
S-shaped excess isotherms,
Enthalpy of displacement of binary liquid mixtures on solid surfaces. Part II. Analysis of — (Dékány et al.) 41
Sucrose,
Negative adsorption of inorganic salts, — and urea at solid-liquid interfaces (Nag et al.) 83
Surface ionization,
Determination of — and complexation constants at colloidal silica/electrolyte interface (Milonjić) 301
Surface tension,
Determination of the apolar component of the — of water by contact angle measurements on gels (Van Oss et al.) 369
Tar sands emulsions,
Application of X-ray microanalysis to — (Mikula) 267
Thermoporometric study,
— of the intra-aggregate porosity of pyrogenic silica dispersed in aqueous and non-aqeuous liquids (Ehrburger, Lahaye) 105
TiO_2 pigment,
Mechanism of — retention of pulp fiber with polyelectrolytes (Alince) 199
Surface studies of — with especial reference to the role of coatings (Day, Egerton) 137
Tritiated water,
The release of — from synthetic analcime into surrounding water (Todorović et al.) 345
Urea,
Negative adsorption of inorganic salts, sucrose and — at solid-liquid interfaces (Nag et al.) 83
Vesicle-vesicle interaction
— and forces between bilayers in phospholipid systems incorporating phosphatidylinositol (Hammond et al.) 241
X-ray microanalysis,
Application of — to tar sands emulsions (Mikula) 267
Zwitterionic emulsifier,
Interaction of pigments with polystyrene latex prepared using a — (Kato et al.) 159
